

# *Skin Needling Aftercare*

The inflammatory reaction of the skin is extremely short and fades significantly within an hour from redness to pinkish that may last for 12-24 hours. In order to reduce visible redness, we recommend hyaluronic acid 24 hours after the procedure. The use of mineral makeup can be used after the procedure.

## **Please follow these instructions:**

- Do not wash your face or apply any other cream apart from the Stayve gel (that you will be given) for 24 hours after your appointment.
- Your skin will feel warm and appear a little bit red.
- Do not go in a sauna or hot shower straight after your treatment.
- Do not get any waxing done after your treatment.
- Do not go tanning after your treatment.
- Avoid sweating and direct contact with the sun for 24 - 48 hours.
- Avoid exfoliating or scrubbing your face for today
